EXPERIENCE

Logistics Operations Team Leader

Sep 2019 – Nov 2020

JollyChic | China HQ; Saudi Arabia ops | Sep 2019 – Nov 2020

- Directed a team of 40+ staff across logistics and last-mile delivery operations for Saudi Arabia in a high-volume cross-border e-commerce environment, achieving 100% on-time delivery across all shifts and serving over 100,000 customers in the Saudi market
- Redesigned end-to-end shift scheduling workflows using demand forecasting analysis, eliminating coverage gaps and increasing daily throughput by 25%, reducing order processing time from 48 hours to under 24 hours
- Resolved on-site operational disruptions in real time, including customs clearance delays and last-mile delivery exceptions, maintaining uninterrupted workflows across multiple concurrent shifts
- Managed logistics vendor relationships and negotiated carrier contracts, achieving a 15% reduction in per-shipment delivery costs while maintaining SLA compliance
- Implemented performance tracking dashboards monitoring on-time delivery rate, order accuracy, and exception rates; conducted root-cause analysis on failed deliveries and drove corrective action plans to closure
- Coordinated cross-functional alignment between warehouse, transportation, and customer service teams to ensure seamless order fulfillment from Guangzhou hub to Saudi Arabian doorsteps

Assistant Project Manager

Apr 2021 – Feb 2022

Expert Path | Riyadh, KSA | Apr 2021 – Feb 2022

- Executed a comprehensive performance audit of National Water Company (NWC) distillation and treatment stations across Saudi Arabia, identifying critical operational inefficiencies, compliance gaps, and capital expenditure optimization opportunities worth an estimated SAR 2.4M in recoverable costs
- Managed the full project lifecycle including scope definition, timeline management, billing, and cross-functional stakeholder communications; interviewed and shortlisted 100+ candidates for project team roles and coordinated onboarding logistics
- Facilitated alignment between Riyadh Municipality, the Chamber of Commerce, engineering firms, and legal teams to execute a city-wide commercial shop compliance restructuring program, achieving 100% stakeholder sign-off and on-schedule delivery
- Developed compliance documentation frameworks and audit protocols meeting Saudi Arabian regulatory standards (SASO, SCA), resulting in zero non-compliance findings during subsequent governmental inspections
- Prepared executive-level status reports and presentation materials for senior government officials, translating technical audit findings into actionable strategic recommendations for operational improvement

PROJECTS

B2B Yield-Bearing Payment Infrastructure

Independent Research | 2026

Tech: Python, FastAPI, Next.js, React, REST APIs, AWS, PostgreSQL

- Developed a B2B platform enabling banks and fintechs to offer interest-bearing payment accounts through Treasury reserve yield pass-through, targeting the \$50-80B annual US float income market
- Built yield calculation engine in Python with daily accrual ($\text{balance} \times \text{rate} \times 1/365$), reconciliation divergence tracking, and tiered basis-points economics for 3 partner tiers (75/65/50 bps)
- Implemented 8 REST API endpoints in FastAPI for account management, yield balances, dispute tracking, alerts, rate discrepancy monitoring, portfolio forecasting, and regulatory reporting (IRS 1099-INT, state unclaimed property)
- Designed US Sponsor Bank regulatory pathway (3-6 months, \$50-200K/year cost) and EU EMI Partnership with 27-state MiCA passporting; analyzed FDIC insurance implications and state-by-state MTL requirements
- Quantified the reconciliation gap: FloatYield's simple interest (/365) vs Treasury's actual/actual accrual at ~90 bps/year on a \$1B deposit book, equivalent to ~\$900K in annual divergence

- Conducted unit economics red team: Year 3 scenario at 50 bps on \$1.5B average daily balance yields \$7.5M revenue, \$1.35M reconciliation liability, and a 5.6× coverage ratio
- Identified and documented capital sequencing risk: ILC charter formation requires 18-24 months while Year 1 revenue runway is insufficient without bridge financing
- Produced 12-slide HTML pitch deck and comprehensive FloatYield_Report.md covering TAM/SAM/SOM analysis, regulatory framework, competitive landscape, and go-to-market strategy

INTERNATIONAL EXPERIENCE

CUFE Week Exchange — Beijing, China

Mar 2026

Singapore Management University

- Analyzed China's AI landscape via site visits to iFLYTEK, Haidian Science City, and Meituan 'Super Brain'; evaluated wearable AI market entry strategy for Western brands in China

Overseas Immersion Programme — Bangkok, Thailand

Oct 2025

ESG & Community Stewardship Focus

- Conducted field research on mangrove conservation in Bang Tabun district; developed community ESG stewardship framework for coastal resilience; evaluated DTGO's Forestias megaproject

EDUCATION

Master of Business Administration — Finance Track

Aug 2026 – Present

Singapore Management University

Bachelor of Arts — English Language and Translation

Apr 2014 – Dec 2018

Qassim University, Saudi Arabia

SKILLS

Fintech & Finance	Technical	Operations	Regulatory & Compliance	Languages
Yield Accrual Engineering	Python	Supply Chain Optimization	Sponsor Bank Model	Arabic (Native)
Treasury Reserve Management	FastAPI	Risk Management	FDIC Insurance Framework	English (Professional)
DCF / LBO Modeling	Next.js / React	ESG Analysis	MiCA / EMI (EU)	Mandarin (Conversational)
Regulatory Reporting (1099-INT)	REST API Design	Go-to-Market Strategy	AML / KYC Protocols	
Basis Points Economics	PostgreSQL	Stakeholder Management	BSA / FinCEN Compliance	
Capital Structure Analysis	AWS (EC2, S3, RDS)	Cross-cultural Leadership	State MTL Licensing	
Portfolio Management	pandas / NumPy	Performance Auditing	Unclaimed Property Laws	
EBITDA Normalization	scikit-learn	Project Management	OFAC Screening	
M&A; Fundamentals	Data Visualization	Strategic Planning	CUSO Structure	
Comparable Co. Analysis	Git / Version Control	Process Improvement	SR 11-7 Model Governance
